

# Community Feedback

Through the Community Social hosted in November 2016, subsequent meetings with members of the community, and focus group sessions we've received some preliminary feedback on our ideas.

## Family Housing

Design that responds to family life through semi-private spaces, programming options, storage opportunities, and spaces for all ages.

## Urban Design

A design that breaks the mould and recognizes the unique nature of the community - a human scale design that is inclusive and encourages interaction and exploration.

## First Nations Community

Members of the First Nations Community play a big part in the Commercial + Broadway neighbourhood. Ensuring that they are included in discussions related to public art, public space, and other aspects of the project is integral.

## Housing Mix

A variety of housing options, including a mix of strata, market and non-market rental, co-op housing, and micro-suites, as well as price points to support growing families, struggling artists, singles, and seniors.

## Public Realm

Safe, traffic-free gathering spaces with shelter that appeal to all ages and provide programming options.

## Connectivity

Pedestrian connections, wayfinding and bike infrastructure to ensure the project is well integrated and porous.

## Retail and Amenities

The retail character of the neighbourhood should be reflected in the project - local, European feel, small, outdoor seating.
